

Name: **SOT-23 to DIP Adapter**

Code: **MR006-004.1**

The SOT-23 to DIP Adapter is a board that allows the mounting of 3, 5 and 6 pins SOT-23 ICs on the top side; all the signals are broken out through two 0,1" (2,54mm) standard spacing headers that have a 0,3" DIP standard spacing.

This Adapter grants a very simple way to use commercial components sold only in SOT-23, SC-59 and TO-236 formats with standard breadboards, sockets and protoboards.

The SOT-23 to DIP Adapter is provided complete with 2 standard spacing headers required to a correct use of the board.

## ***SPECIFICATIONS***

- Dimensions: 0,4" x 0,3" (10,16mm x 7,62mm)
- Weight: 0,008 oz (0,2 g) (without connectors)
